INTERNSHIP EXPERIENCES

Agentic AI – AlgoTutor	2026
Developed AI-driven applications that leverage Large Language Models (LLMs), Retrieval Augmentation Generation (RAG), AI Agents, Model Context Protocol (MCP), embeddings, vector databases, and LLMs locally through Ollama, supporting semantic search and contextual retrieval.	
MERN Stack Intern - Bytes Lab	2025
Completed hands-on training in the MERN stack, working with MongoDB, Express.js, React.js, and Node.js to build full-stack web applications while strengthening fundamentals of REST APIs and frontend–backend integration - Link	

SKILLS ACQUIRED:

Frontend : HTML, CSS, JavaScript, ReactJS, TailwindCSS, Bootstrap
Backend : Node.js, Express.js, REST APIs, MongoDB, MySQL
AI/GenAI: LLMs, RAG, AI Agents, MCP, Prompt Engineering
Tools & Frameworks: Ollama, OpenAI, Google Gemini, Hugging Face, LangChain, Vector Databases
Cloud: AWS EC2, Netlify, Render

PROJECTS

WealthWise v2:	Github	Jan 2026
Tech Stack: HTML5, CSS3, JavaScript, Node.js, Express.js, Groq API.		
Created a web application using JavaScript that assists people in making decisions about their investments. This project includes front-end interactivity along with real-time data processing to offer personalized wealth information. This is an illustration of my ability to utilize JavaScript, UI/UX design, state management, and developing functional web applications.		
GenAI Personal Finance Chatbot:	Github	Aug 2025
Tech Stack: Python, Streamlit , Google GeminiAI key, Granitemodel, Pandas, Matplotlib, CSV data handlin		
Created a Python and Streamlit-powered application for financial management that included an AI chatbot which could record transactions, classify expenses automatically, and give personalized financial advice. Added functionality of creating visual charts and generating PDF reports to facilitate financial analysis.		
Gesture Password System:	Github	Dec 2024
Tech stack: HTML ,CSS, Python,Django,PostgreSQL, OpenCV, MediaPipe.		
Developed a secure, console-based multi-authentication system supporting gesture password, face recognition, and numeric PIN as login methods. Leveraged OpenCV, MediaPipe, and face-recognition libraries to simulate real-world user authentication scenarios.
